Title of the Practice

1. ICT -The Need of Hour.

2. **Goal:** Now a day the information technology and use of ICT is very much important in imparting the latest knowledge in almost every field. One part of the mission of our institution is to enable students to face various challenges of the changing world. In this context the use of ICT play a key role. As the institution is situated in rural area most of the students came from uneducated, economically poor and socially disadvantaged families. The objectives of institution are to up lift and upgrade the learners from rural area to face the various challenges of changing world and to be in pace with urbanite learners; so that they should not lag behind them.

The goal of this best practice is to provide essential ICT facilities to the staff as well as students and to motivate them to use it.

3. **The Context:** Prior to this practice we were using the traditional teaching methods. There was lack of modern teaching methods based on ICT. The college managements approach about the use of ICT is very positive. They provide some fund to establish these facilities at the campus before we received UGC funding. As the college received funding resources from UGC we have purchased all the equipment, accessories related to ICT and made available sufficient facilities. In the college there are two audio-visual rooms equipped with internet facility, LCD projector and public address system. Out of two audio-visual rooms one room is air-conditioned. There is broadband radio internet connectivity of 10mbps. All the departments are connected with LAN. The computers with printer and necessary accessory along with hi-speed internet facility are provided to all departments by the institution. The standby power supply facility such as UPS (Uninterrupted Power Supply), Generator set is also available at the campus.

In short we have made available whatever we fill necessary for the maximum usage of ICT. But internally, the greatest challenge before the institution is to change the mental setup of our students and employees. However, by continuously motivating them, most of the students and members of teaching and non teaching staff are taking advantage of the ICT facilities.

4. The Practice:

ICT-The Need of Hour is the best practice adopted by the institution. For the effective implementation of this practice we have planned certain important things.

We have organized awareness programme to develop the ICT aptitude among the students, teachers and non-teaching employees of the institution. The resource persons are frequently invited to inculcate the importance and significance of the ICT based tools and their application. Our faculty delivers lectures on online services like e-Suvidha, e-scholarship for the students.

The facility of e-books & e-journals from INFLIBNET is also available at the campus. Most of the important documents are converted into soft copies by scanning process.

With the help of the funds received from UGC the ICT facilities are made available at the campus. We have created almost all the ICT facilities. The list of available tools, equipment's and facilities is below:

Sr. No.	Name of the tool	Quantity
01	Laptop Computer	02
02	Desktop Computer	30
03	LCD projectors	04
04	LCD screen	03
05	Printers	12
06	Internet connections	02
07	M.S. Office license software	35
08	Windows operating system license software	35
09	SOUL software	01
10	College Management System Software	01

5. **Evidence of Success:** The feedback from the students and the staff show the success rate such as performance against target.

	Target	Success	Percentage
No. of computer literate faculty	21	21	100%
No. of faculty using ICT in teaching	21	18	85.71%
No. of computer literate non-teaching employees	11	11	100%
No. of computer literate students.	587	378	64.39%

These results indicate that the institution is becoming successful to achieve desired target of 100 % computer literacy at the campus. Computer literacy is the foundation of the use of ICT facilities.

6. **Problems Encountered and Resources Required:** As per our need we have enough resources to face the problems. There are no major problems occurred. If any technical problem arises our technician resolves it. We also call professionals whenever necessary.

2. Title of the Practice: CHEMISTRY ASSOCIATION OF STUDENTS

Chemistry Association is an extension programme. The College aspires to focus on the overall personality development of the students along with the academic excellence. It is one of the best practices used to realize the goals of the college-the empowerment of rural student and bringing about social changes.

GOAL

1. To develop awareness and interest of learning, in the hearts of the today's student.
2. To tap and groom the inherent talents of the students.
3. To make students multidimensional.
4. To inculcate interest and build confidence among the students whose academic performance is average or below average.
5. To improve the academic performance of meritorious students.
6. To create interlink between UG and PG students.
7. To give encouragement to innovative ideas of students.
8. To think clearly and critically and to communicate effectively.
9. To bring forth the team spirit and leadership qualities of the students.
10. To make some entertainment with academic work.

THE CONTEXT

In the direction to achieving goal, at the starting of college, chemistry department of college established Chemistry Association of student. Structure of this association is like a management body of any institution. In this Principal of college and HOD of chemistry department appoint one Assistant professor as a teacher in charge of Chemistry association, and other posts like president, vice president, secretary, joint secretary and members are occupied by UG and PG students. In the structure of association from each class of B.Sc. and M.Sc., have a two member, one boy and one girl. All the authority of planning and discussion has this main body. With this main body we make different committees of students like Aroma committee, refreshment committee, Rangoli committee, Stage decoration and Arrangement committee etc with one committee chairman. Initially main body makes a tentative schedule of programs and activity that have to taken. Then give responsibility of each activity or Programms to one teacher in college just as a observer and guide. Chemistry association does not demand any funding to college, it is self running association, create its funds from collection of 20 or 30 rupees per students.

4. The Practice Describe the practice and its uniqueness in the context of Indian higher education. What were the constraints / limitations, if any, faced (in about 400 words)?

The institution's goal is to ensure all-round participation, has been implemented successfully. Over the last years, the college has been organizing different programs and activity under chemistry association conducted and managed by the students and teachers. Initially association makes a tentative schedule of programs or activity taken. Last two year association conduct following activity.

ii) Inaugural function of chemistry association.

It is a first activity conducted by chemistry association, in which we announce names of all members of chemistry association. Inauguration is done by the hands of invited guest from other college and guest lecture is also arranged.

iii) Power point presentation of laboratory equipment for B.Sc. first year students.

To create awareness, utility, information and working of laboratory equipments, ppt is organized for newly admitted B.Sc. first year students.

iv) Aptitude test of basic science for B.Sc. and B.A. student.

To create a interest and check primary basic knowledge of student chemistry association organizes aptitude test for all B. Sc. and B. A. students. The paper of this test is completely set by M. Sc. student also they run exam and evolution of paper too. Paper of aptitude test is based on basic knowledge of mathematics, science, computer science, environmental, general knowledge, history and other basic question.

- **Seminar competition for B.Sc. and B.A. student.**

In today's education system communication skill and presentation is a most important part of personality development. For that association organized seminar competition for B.Sc. and B.A. student. Topic of seminar competition is pure and general science for B.Sc. student and topic related to latest issue for B.A. students. To observe the seminars of students we appoint three judges either from college or outside the college and result prepares by doing complete average of score of all three judges.

- **Regular seminars of M.Sc. students**

It is a part of syllabus but arrange seminar in some different manner. Seminar is every Saturday once in weak, after seminar student arranges some entertainment program and tea.

- **Quiz competition**

It is a most interesting and entertaining activity of association. It is fully power point quiz. For this we make group of four students and has three to four round. First two rounds are eliminating round and it is observed by teachers and whole quiz is run by M.Sc. student.

- **Essay competition.**

For a different latest issue we invite essay from B.Sc. and B. A. student and it is evaluated by expert from college.

- **Prize distribution program**

Winner of various activity are felicitate by giving them certificate and memento by the hands of invited guest from other college.

- **Science day celebration**

This is the last activity of chemistry association; on the occasion of science day we invite a guest talk on science, recent trends in science, what is contribution of India research in today's science.

- **Dissolution of chemistry association.**

At the last of science day program present of chemistry association read a summery of overall academic year and express his views about chemistry association, also with this student shares their opinion, and what they feel during working with association. We get a very excellent performance of student in all activity. And college observes the improvement of student in their personality their presence of knowledge, their ways of communication.

5. Evidence of Success:

Chemistry association keeps a proof of all activity or program taken. And we bunch all document of each program in on single file along with photographs. Colleges feel very proud because the work done by association is excellent. Our student also gets success in outside event of university. For example we consistently achieve first prize in intercollegiate seminar competition of M. Sc. also reach at state level selection round of AVISHKAR which is held by state government of Maharashtra. Along with mention strong presence in various activity of university. We are very happy when student gives its credit to association.

6. Problems Encountered and Resources Required

1. College student are mostly from economical backward class, so they can not pay for more collection.
2. Most of student of college are outside the town, so they can not give extra time for programs of activity of association because their buses timing.
3. For many Works College students are depends on other because they don't have some equipment like Laptop, Computer, and Xerox.
4. College has a very small auditorium.
5. Association does not have sponsor.

7. NOTE

1. The college motivates the students to have increased involvement in the programs organized by the chemistry association.
2. Student response is very good that's why we teachers feel very satisfactory.
